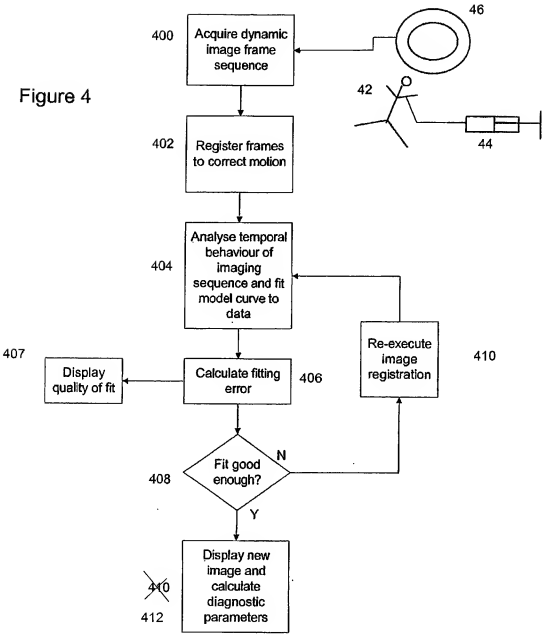
Figure 4



400
Acquire dynamic image frame sequence
46
42
44
402
Register frames to correct motion
404
Analyse temporal behaviour of imaging sequence and fit model curve to data
407
Display quality of fit
Calculate fitting error
406
Re-execute image registration
410
408
Fit good enough?
N
Y
410
412
Display new image and calculate diagnostic parameters
